| 4800IP | 125 mm | 380 mm | 300 mm           | 4400 mm          | 4800 mm           |

## **Advantages BioJet cleaning systems**

- Universal, water/solvent/UV based inks and even 2-components coatings can be cleaned easily
- Safe, hardly any chance on damages to anilox rolls
- Environmentally friendly, powder can be deposited with regular waste
- Fast
- Completely automated and therefore operator-friendly
- Low electricity consumption
- Immediately after cleaning, roll can function in the machine again (no cool-down time necessary)
