

The Measure of Quality.

Are you getting the most from your label operation?

When it comes to narrow web ink metering rolls, no one else comes close to Apex in terms of journal and base quality, roll durability, weight and — just as important — turnaround.

FASTER TURNAROUND Apex boasts the world's largest inventory with over a thousand pre-coated bases in popular sizes *in stock* and awaiting your order. Examine some of our standard stock items below.

MORE DURABLE Thanks to Apex's ceramic and laser engraving innovations coupled with our top-of-the-line stainless steel journals and headers, our **UniFli^{GTT}** and conventional rolls enable unrivaled longevity, precision and cleanability. What's more, every Apex roll is manufactured with a nickel corrosion barrier to maximize roll lifespan.

LIGHTWEIGHT Easier handling, installation and storage. Our rolls are 30% - 50% lighter than other rolls on the market.

UniFli^{GTT} Label/Narrow Web Stocking Programme The Widest Selection of In-Stock Bases in the Industry
